IN RE: YAHOO! INC. CUSTOMER  
DATA SECURITY BREACH  
LITIGATION

Case No. 5:16-MD-02752-lhk  
The Honorable Lucy H. Koh

**DECLARATION OF JEANNE C. FINEGAN, APR CONCERNING  
PROPOSED NOTICE TO SETTLEMENT CLASS MEMBERS**

---

**INTRODUCTION**

1. I am President and Chief Media Officer of HF Media, LLC, Inc. (“HF Media”) a division of Heffler Claims Group LLC (“Heffler”). This Declaration is based upon my personal knowledge as well as information provided to me by my associates and staff, including information reasonably relied upon in the fields of advertising media and communications.

2. Pursuant to the Settlement Agreement Paragraph 2.23, Heffler has been engaged by the Parties, to develop and implement a proposed legal notice program as part of the parties’ proposed class action settlement. This program is highly targeted and well-designed to reach Class Members by employing best in breed tools and technology to apply the most modern approach to notice in both the United States and in Israel by combining direct email notice, print media, and over 170 million online and social impressions with cross device targeting on desktop and mobile, as well as press releases.

3. This Declaration describes my experience in designing and implementing notices and notice programs, as well as my credentials to opine on the overall adequacy of the notice effort. This Declaration will also describe the proposed notice program and address why this comprehensive proposed program is consistent with other best practicable court-approved notice programs and the requirements of Fed. Civ. P. 23(c)(2)(B) and the Federal Judicial Center (“FJC”)

guidelines<sup>1</sup> for Best Practicable Due Process notice.

4. The notice program, described hereinafter, is estimated to reach approximately 80 percent of the target audience of Adults 18+ Gmail users (“Adult Email Users”) in the United States, with an average frequency of approximately 3 times and over 77 percent of the target audience of Adults 18+ in Israel with an average frequency of approximately 4 times.

### **QUALIFICATIONS**

5. My credentials that qualify me to provide an expert opinion regarding notice in this matter include more than 30 years of communications and advertising experience. I am the only Notice Expert accredited in Public Relations (APR) by the Universal Accreditation Board, a program administered by the Public Relations Society of America. Further, I have provided testimony before Congress on issues of notice. Also, I have lectured, published and been cited extensively on various aspects of legal noticing, product recall and crisis communications and have served the Consumer Product Safety Commission (CPSC) as an expert to determine ways in which the CPSC can increase the effectiveness of its product recall campaigns. More recently, I was extensively involved as a contributing author for “*Guidelines and Best Practices Implementing 2018 Amendments to Rule 23 Class Action Settlement Provisions*” published by Duke University School of Law. Also, I am a member of the Board of Directors for the Alliance for Audited Media (“AAM”).

6. I have served as an expert, with day-to-day operational responsibilities, directly responsible for the design and implementation of hundreds of class action notice programs, some of which are the largest and most complex programs ever implemented in both the United States and in Canada. My work includes a wide range of class actions and regulatory and consumer matters that include product liability, construction defect, antitrust, asbestos, medical, pharmaceutical, human rights, civil rights, telecommunications, media, environmental, securities, banking, insurance and bankruptcy.

7. Additionally, I have been at the forefront of modern notice, including plain

language as noted in a RAND study<sup>2</sup>, and importantly, I was the first notice expert to integrate digital media and social media into court-approved legal notice programs. My recent work includes:

- *Carter v Forjas Taurus S.S., Taurus International Manufacturing, Inc.*, Case No. 1:13-CV-24583 PAS (S.D. Fl. 2016);
- *In re: Blue Buffalo Marketing and Sales Practices Litigation*, No. 14-md-02562-RWS (E.D. Mo. 2016); and
- *In re: TracFone Unlimited Service Plan Litigation*, No. C-13-3440 EMC (N.D. Cal. 2015).

8. As further reference, in evaluating the adequacy and effectiveness of my notice programs, courts have repeatedly recognized my work as an expert. For example, in:

- (a) ***Carter v Forjas Taurus S.S., Taurus International Manufacturing, Inc., Case No. 1:13-CV-24583 PAS (S.D. Fl. 2016)***. In her Final Order and Judgment Granting Plaintiffs Motion for Final Approval of Class Action Settlement, the Honorable Patricia Seitz stated:

*“The Court considered the extensive experience of Jeanne C. Finegan and the notice program she developed. ...There is no national firearms registry and Taurus sale records do not provide names and addresses of the ultimate purchasers... Thus the form and method used for notifying Class Members of the terms of the Settlement was the best notice practicable. ...The court-approved notice plan used peer-accepted national research to identify the optimal traditional, online, mobile and social media platforms to reach the Settlement Class Members.”*

9. Additionally, in the January 20, 2016, Transcript of Class Notice Hearing, p. 5 Judge Seitz, gave accolades to Ms. Finegan, noting:

*“I would like to compliment Ms. Finegan and her company because I was quite impressed with the scope and the effort of communicating with the Class.”*

- (b) ***In Re: Blue Buffalo Company, Ltd., Marketing and Sales Practices Litigation, Case No. 4:14-MD-2562 RWS (E.D. Mo. 2015)***, (Hearing for Final Approval, May 19, 2016 transcript p. 49). During the Hearing for Final Approval, the Honorable Rodney Sippel said:

*“It is my finding that notice was sufficiently provided to class members in the manner directed in my preliminary approval order and that notice met all applicable requirements*

*of due process and any other applicable law and considerations.”*

- (c) ***In re: Skechers Toning Shoes Products Liability Litigation, No. 3:11-MD-2308-TBR (W.D. Ky. 2012)***. In his Final Order and Judgment granting the Motion for Preliminary Approval of Settlement, the Honorable Thomas B. Russell stated:

*“... The comprehensive nature of the class notice leaves little doubt that, upon receipt, class members will be able to make an informed and intelligent decision about participating in the settlement.”*

- (d) ***Quinn v. Walgreen Co., Wal-Mart Stores Inc., 7:12 CV-8187-VB (S.D.N.Y.)*** (Jt Hearing for Final App, March. 5, 2015, transcript page 40-41). During the Hearing on Final Approval of Class Action, the Honorable Vincent L. Briccetti gave accolades to Ms. Finegan, noting:

*“The notice plan was the best practicable under the circumstances. ... [and] the proof is in the pudding. ... So the notice has reached a lot of people and a lot of people have made claims.”*

- (e) ***DeHoyos, et al. v. Allstate Ins. Co., No. SA-01-CA-1010 (W.D.Tx. 2001)***. In the Amended Final Order and Judgment Approving Class Action Settlement, the Honorable Fred Biery stated:

*“[T]he undisputed evidence shows the notice program in this case was developed and implemented by a nationally recognized expert in class action notice programs. ... This program was vigorous and specifically structured to reach the African-American and Hispanic class members. Additionally, the program was based on a scientific methodology which is used throughout the advertising industry and which has been routinely embraced routinely [sic] by the Courts. Specifically, in order to reach the identified targets directly and efficiently, the notice program utilized a multi-layered approach which included national magazines; magazines specifically appropriate to the targeted audiences; and newspapers in both English and Spanish.”*

12. A comprehensive description of my credentials and experience that qualify me to provide expert opinions on the adequacy of class action notice programs is attached as **Exhibit A**.

### **SUMMARY NOTICE PROGRAM**

13. This Notice program is designed to inform class members of the proposed class action settlement between Plaintiffs and Defendants, as described in the Settlement Agreement, the class is: All U.S. and Israel residents and small businesses with Yahoo accounts at any time during January 1, 2012 – December 31, 2016; provided, however, that the following are excluded from the Settlement Class: (i) Defendants, any entity in which Defendants have a controlling interest, and Defendants’ officers, directors, legal representatives, successors, subsidiaries, and assigns; (ii) any judge, justice, or judicial officer presiding over this matter and the members of their immediate families and judicial staff; and (iii) any individual who timely and validly opts-out from the Settlement Class.

### **DIRECT OUTREACH - EMAIL**

15. I am informed by Yahoo that approximately 900 million to one billion Yahoo accounts representing approximately 200 million unique U.S. and Israeli residents , were affected by the data breaches. I have been informed that **email will be sent to all identified accounts.** Based on data from third-party vendors that monitor email usage and confidential business records, I understand that of these counts, there are currently approximately 50 to 60 million residents of the U.S. and Israel that actively use his or her Yahoo Mail account.

### **EMAIL PROCESS**

16. Heffler uses the best-in-class technology, software, and methods to provide the most effective email notification campaigns. Our Notification team works with some of the leading providers of business services for marketing and transactional email and will work closely with Yahoo. These providers review the campaign's data and monitor the mass email distributions we make in our Legal Notification programs. They provide Heffler with dedicated support

throughout the campaign, maintain an excellent reputation among Internet Service Providers (“ISPs”), and update their network to keep pace with the evolving ISPs. These actions ensure that as many of the potential Class Members as possible receive email notification of pending class action litigation.

17. At the outset, to ensure the highest email delivery rate, Heffler intends to use reasonable industry practices to minimize the inability to deliver emails due to spam and other filters.

18. After acquiring the client email contact list, that list is de-duplicated so that a single email Settlement Notice will be delivered to a valid email address.

19. The list of unique email addresses is then further analyzed for formatting, spelling errors or incomplete addresses to identify any invalid email addresses. These invalid emails are marked as pre-send errors and are extracted from the send list prior to delivery. Removing these invalid emails is crucial to minimizing the risk of being filtered into spam or blacklisted because sending an email to an invalid email damages a sender’s reputation. The email content is then formatted and structured in a way that receiving servers expect, allowing the email to pass easily into the recipient’s inbox.

20. Our team reviews the proposed email subject line and body content for potential spam filter triggering words and phrases, and provides recommendations for any trouble spots. We also review the readability and potential truncation across all common current platforms (smartphones, laptops, tablet, desktop, etc.) to ensure that the message remains the same, no matter what device upon which it is being viewed.

### **EMAIL PROGRAM LAUNCH**

21. Heffler’s email team sends emails to all of the email addresses in our client’s database that are identified as valid. Larger campaigns use a ramping process, also known as “throttling,” in which emails are sent in smaller batches throughout the day or over several days, weeks or months, depending on the Class size. Maintaining control of the amount of emails sent per hour or per day can increase the deliverability rate by reducing impact on an ISP’s traffic. Doing so avoids overloading the traffic and thus ensuring that we won’t be blocked due to a stressful impact on the ISP.

22. Further, our email employs DKIM<sup>3</sup> certification. DKIM is used to authenticate our mail server's sending domain and that we are who we say we are. DKIM also prevents the email from being altered or modified in transit so the recipient and domain can trust the email originated from the sender. Additionally, in order to maintain the best reputation with ISP's, our provider updates a domain's DNS SPF records to show that the domain is reputable or 'cleared' to send.

### **HEFFLER'S TEAM MONITORS DELIVERABILITY**

23. Hard bounces are emails that are rejected for a permanent reason that cannot be corrected, such as that the address no longer exists. When our provider notifies us of a hard bounce in our email list, Heffler marks the record in its database accordingly.

24. Soft bounces are emails that are rejected for reasons that can be corrected, such as the email recipient's inbox is full, or the ISP is momentarily down. When these occur during the email campaign, we continue to retry the email one to three more times over a period of 48 hours. Spreading out the send attempts prevents a spam flag and gives the ISP a cool down period to accept the additional attempt if it was previously denied. Emails that fail to deliver after these re-send attempts can then be categorized as a hard bounce. These records are again marked in the settlement database as having an undeliverable email address.

25. It is important to limit and monitor any complaints we may receive in response to our emails. We include an "unsubscribe" in all our emails to ensure the recipient has a fast, easy way to opt-out of receiving any future emails from Heffler regarding that case. Individuals that unsubscribe from future case-specific emails are marked in the database to prevent any future emails from being sent to the individual.

---

<sup>3</sup> Domain Keys Identified Mail (DKIM) allows senders to associate a domain name with an email message, thus vouching for its authenticity. This is done by "signing" the email with a digital signature, a field that is added to the message's header. A "signature" is generated by the sending mail transfer agent (MTA) using an algorithm, applied to the content of the signed fields, which creates a unique string of characters, a "hash value." When the signature is generated, the public key used to generate it is stored at the listed domain. After receiving the email, the recipient MTA can verify the DKIM signature by recovering the signer's public key through DNS. It then uses that key to decrypt the hash value in the email's header and simultaneously recalculate the hash value for the mail message it received. If these match, then the email has not been altered. This gives users some security knowing that the email did actually originate from the listed domain, and that it has not been modified since it was sent.

## **REPORTING**

26. Throughout the email campaign, Heffler receives feedback from the ISPs providing insight on deliverability of the email. If the email is undeliverable for some reason that cannot be corrected (such as an email account that has been closed), we flag the undeliverable email address in the client's database and do not re-send the email. A full report of all emails attempted to be sent, hard bounces, and unsubscribes are delivered upon completion of the campaign.

## **CAFA NOTICE**

27. I am informed that Yahoo will serve the notice required by the Class Action Fairness Act of 2005, 28 U.S.C. § 1715, no later than ten days after this Agreement is filed with the Court.

## **METHODOLOGY FOR PUBLICATION/INTERNET NOTICE**

28. To appropriately design and target the publication component of the notice program, HF Media utilized a methodology accepted by the advertising industry and embraced by courts in the United States.

29. Accordingly, we are guided by well-established principles of communication and utilize best-in-class nationally syndicated media research data provided by GfK Mediamark Research and Intelligence, LLC<sup>4</sup> ("MRI"), online measurement currency comScore<sup>5</sup> (U.S. and Israel), Target Group Index<sup>6</sup> (Israel), The Israeli Bureau of Statistics and Statista among others, to provide media consumption habits and audience delivery of the potentially affected population. Based on this research, our cutting-edge approach to notice focuses on the quality of media

---

<sup>4</sup> GfK MRI's *Survey of the American Consumer*® ("MRI") is the industry standard for magazine audience ratings in the U.S. and is used in the majority of media and marketing agencies in the country. MRI provides comprehensive reports on demographic, lifestyle, product usage and media exposure.

<sup>5</sup> comScore is a global Internet information provider on which leading companies and advertising agencies rely for consumer behavior insight and Internet usage data. comScore maintains a proprietary database of more than 2 million consumers who have given comScore permission to monitor their browsing and transaction behavior, including online and offline purchasing. This data includes and fuses 1<sup>st</sup> party, (website data), second party (data shared by websites for marketing purposes) and 3<sup>rd</sup> party data, tied to offline purchasing behavior.

<sup>6</sup> TGI (Target Group Index) data is available quarterly and covers consumer attitudes, habits, motivations and behaviors.

exposure, engagement and appropriate media environment.

30. These data resources are used by advertising agencies nationwide as the basis to select the most appropriate media to reach specific target audiences. The resulting key findings are instrumental in our selection of media channels and outlets for determining the estimated net audience reached through this legal notice program. Specifically, this research identifies which media channels are favored by the target audience (*i.e.*, the Class Members). For instance, browsing behaviors on the Internet, social media channels that are used, and which magazines Class Members are reading.

31. For this program, HF Media employs the best-in-class tools and technology in order to appropriately target Class Members and appropriately measure and validate audience delivery using Media Ratings Counsel accepted third-party validation of media. By utilizing these media research tools, we can create target audience characteristics or segments, and then select the most appropriate media and communication methods to best reach them.

32. This media research technology allows us to fuse data and accurately report to the Court the percentage of the target audience that will be reached by the notice component and how many times the target audience had the opportunity to see the message. In advertising, this is commonly referred to as a “Reach and Frequency” analysis, where “Reach” refers to the estimated percentage of the unduplicated audience exposed to the campaign, and “Frequency” refers to how many times, on average, the target audience had the opportunity to see the message. The calculations are used by advertising and communications firms worldwide and have become a critical element to help provide the basis for determining adequacy of notice in class actions.

33. Additionally, we are the first notice experts to actively monitor, mitigate and cull non-human (ad fraud bot traffic) from digital notice programs. Consistent with our recent successfully implemented court approved notice programs for *Landes v. Sony Mobile Communications* Case No. 2:17-cv-2264-JFB-SL ED NY, and *N.P. v Standard Innovation Corp.*, Case No. 1:16-cv-8655 N.D. of ILL, Ed, we will take active steps on multiple levels to monitor, mitigate and adjust for this type of traffic. This non-human traffic will be identified and culled from our final reach calculations reported to the court.

### **PUBLICATION NOTICE PROGRAM RATIONALE**

34. I am informed by Yahoo Counsel that there are approximately 200 million email

accounts that were compromised by the [date] data breach. As a result of the subsequent data breach announcement, a majority of account holders retired and/or migrated email accounts to other platforms. Research from various sources including the Defendant, and; specifically from GfK Mediamark Research and Intelligence LLC (“MRI”) reports that a majority of those who retired their Yahoo accounts subsequently migrated to Gmail. Of particular interest relevant to the Notice efforts, we see a significant amount of duplication across the various email platforms due to email account holders using multiple email platforms. For example, nearly 45% of current Yahoo users also use Gmail; 43.2% of AOL users also use Gmail and nearly 58% of Outlook users also use Gmail.

35. Therefore, to cast the broadest outreach this Notice program will primarily target users of Gmail, in addition to those who have AOL email accounts. Additionally, we plan to target through keyword search topics such as Yahoo data breach, Yahoo email breach, Yahoo hacking, etc. Importantly, we will include a strong retargeting effort designed to remind individuals who visit the settlement website then abandon that visit. We have included a significant effort on the social platforms Facebook and Instagram targeting those who have Gmail accounts. The U.S. outreach will include both English and Spanish and will also include a press release in both languages. The outreach in Israel will include English and Hebrew and will include a press release in both languages.

### **MAGAZINES (U.S.)**

36. Based on key insights data from MRI summarized above, the magazines below will target Class Members in the United States and were selected based on highest coverage and index<sup>7</sup> against the target audience characteristics.

37. *People Magazine* is a weekly magazine with a circulation of 3,418,548. The summary notice will be published once as a half-page, black and white ad with a Spanish subhead.

38. *National Geographic* is published monthly, with a circulation of 2,943,208. The summary notice will be published once as a half-page, black and white ad with a Spanish subhead.

39. Combined, the magazines in this plan provide a circulation of 6,361,756 with more

<sup>7</sup> Index is a media metric that describes a target audience’s inclination to use a given outlet. An index over 100 suggests a target population’s inclination to use a medium to a greater degree than the rest of the population. For example, an index of 157 would mean that the target is 57 percent more likely than the rest of the population to use a medium.

than 70,000,000 readers<sup>8</sup>.

### **NEWSPAPERS (ISRAEL)**

40. The newspapers below will target Class Members in Israel and were selected based on highest coverage and index against the target audience characteristics based on TGI/Kantar media research.

41. *Israel Hayom* is a Hebrew language newspaper, with a daily circulation of 275,000. The Summary notice will be published once as a black and white 6.06" x 10.98" ad in Hebrew.

## **ONLINE DISPLAY AND SEARCH**

49. This campaign will primarily target U.S. and Israeli Adult Email Users, with additional targeting to people with AOL Mail accounts. Online display ads will be served to this target group across a whitelist of pre-vetted websites. We will use pixel retargeting to provide additional reminders for those have visited the website but did not complete a claim form.

50. Additionally, keyword search ads will target topics related to the data breaches and settlement, such as Yahoo data breach, Yahoo security breach and Yahoo hacking.

## **SOCIAL MEDIA**

51. The Notice program will target U.S. and Israeli Adult Email Users via the social media platforms Facebook and Instagram. Twitter ads will target people who have tweeted or interacted with content about the Settlement or data breaches. MRI reports that nearly 80% of Gmail users have active Facebook accounts. The website will allow visitors to select English, Spanish, Hebrew or Arabic to obtain information.

### **TOLL-FREE INFORMATION LINE**

56. Heffler will establish and maintain a 24-hour toll-free Interactive Voice Response (“IVR”) telephone line, where callers may obtain information about the class action. The IVR option for U.S. callers will be available in English and Spanish. An international toll-free line will be established in Israel and will have options available in English, Hebrew and Arabic.

### **CONCLUSION**

57. In my opinion, the outreach efforts described above reflect a particularly appropriate, highly targeted, and contemporary way to employ notice to this class. Through a multi-media channel approach to notice, which employs direct notice, print, digital, and social and mobile media, an estimated 80 percent of targeted Class Members in the United States will be reached by the media program on average approximately 3 times and approximately 77 percent of Class Members in Israel are estimated to be reached on average approximately 4 times. In my opinion, the efforts to be used in this proposed notice program are of the highest modern communication standards, are reasonably calculated to provide notice, and are consistent with best practicable court-approved notice programs in similar matters and the Federal Judicial Center’s

guidelines concerning appropriate reach.

58. I declare under penalty of perjury, under the laws of the United States of America, that the foregoing is true and correct. Executed on October 22, 2018 in Tigard, Oregon.

### JUDICIAL COMMENTS AND LEGAL NOTICE CASES

In evaluating the adequacy and effectiveness of Ms. Finegan's notice campaigns, courts have repeatedly recognized her excellent work. The following excerpts provide some examples of such judicial approval.

Finegan and the notice program she developed. ...There is no national firearms registry and Taurus sale records do not provide names and addresses of the ultimate purchasers... Thus the form and method used for notifying Class Members of the terms of the Settlement was the best notice practicable. ...The court-approved notice plan used peer-accepted national research to identify the optimal traditional, online, mobile and social media platforms to reach the Settlement Class Members.***

Additionally, in January 20, 2016, Transcript of Class Notice Hearing, p. 5 Judge Seitz, gave accolades to Ms. Finegan, noting:

Toll-free telephone lines have been set up, and it appears that class counsel and the Claims Administrator have received innumerable calls from potential class members. Additionally, with regard to the third-year notice program for Louisiana-Pacific, the Honorable Richard Unis, Special Master, commented that the notice was:

***...well formulated to conform to the definition set by the court as adequate and reasonable notice. Indeed, I believe the record should also reflect the Court's appreciation to Ms. Finegan for all the work she's done, ensuring that noticing was done correctly and professionally, while paying careful attention to overall costs. P. 23, helped to insure that the notice given in this case was consistent with the highest standards of compliance with Rule 23(d)(2).***

In granting final approval to the settlement, the Court found:

**City of New Orleans Tax Revisions, Post-Hurricane Katrina.** In 2007, the City of New Orleans revised property tax assessments for property owners. As part of this process, it received numerous appeals to the assessments. An administration firm served as liaison between the city and property owners, coordinating the hearing schedule and providing important information to property owners on the status of their appeal. Central to this effort was the comprehensive outreach program designed by Ms. Finegan, which included a website and a heavy schedule of television, radio and newspaper advertising, along with the coordination of key news interviews about the project picked up by local media.
